

The diagram consists of two concentric rectangular borders. The outer border is a thin red line, and the inner border is a thin green line. The space between these two lines is white. The text is centered within this white space.

Red line = Cut Line
Green line = Safe area

Images you want to bleed to the edge of the page should go all the way to the black line (extend beyond the red line). All text and other elements that you do not want cut off should be inside the green line.
